

# Dominic Guzzo

## Biography

Dominic brings a strong educational background in Technology and Cybersecurity, holding a Bachelor degree in Computer Science and a Master degree in Cybersecurity.

In addition to his educational background, he has experience executing technology projects for financial institutions both in Canada and in the United States. These projects consisted of cybersecurity, data analytics, and digital transformation related initiatives applied to critical banking processes and systems. Furthermore, Dominic brings community presence, volunteering his time to mentor students in technology at Ontario Tech University and at his current workplace. He volunteers with an AI team in driving innovation and company value initiatives.

Dominic has served as an Associate Director on the OCCU board since October 2024, where he has served on the IT committee. He gained valuable experience learning the operations of the board and management system of the credit union.

Dominic is seeking election to the OCCU Board of Directors because he brings a strong mix of technology experience and education. His experience working on projects for various financial institutions, allow him to provide valuable guidance to the Board in navigating the dynamic technology landscape and its growing integration in the financial system. Members should vote for Dominic because he can provide the skills, expertise, fresh perspective, and dedication necessary to help drive the success of OCCU.
